The Ohio yearly meeting of Friends will convene in Damascus Tuesday, August 20, and continue for one week. While the many sessions of the week except on Sunday will be devoted to business, devotional services will be held each evening. The Ohio yearly meeting was established at Mount Pleasant in 1813 and was held continuously there each year until about a third of a century ago when by a decree of the meeting composing the yearly meeting it was ordered that each alternate yearly meeting be held at Damascus. Two years ago it was decided to abandon Mount Pleasant as a meeting place, and to hold the yearly meetings in the future at Damascus with the exception of the year 1912 when it will be held at the original meeting place as a centennial meeting. This year at the Damascus gathering a number of the leading ministers of the church from other states have manifested their intention of attending and a very large attendance is predicted for the coming gathering.

NILES & LISBON BRANCH

Railroad to be Extended From Lisbon to Beaver, Pa., by New York Central Co.

The Lisbon Journal says a railroad to connect Lisbon with Beaver, Pa., via Wellsville and East Liverpool, surveyed by a party of surveyors in the employ of the New York Central, is the latest feature to appear under the caption of railroad news in this section.

Friday evening the surveyors and their helpers completed their preliminary survey of the route by connecting up with the disused Erie railroad switch at Smith's crossing near Saratoga east of this city.

The route of the proposed connection will pass through West Point and from there southwest to Wellsville. From Wellsville the line will pass to East Liverpool and thence to Beaver.

The party of surveyors which have been at work on the route since March of this year, have found the route perfectly feasible and have given out the impression that the work will be started as soon as the plans and estimates have been checked up by those who are behind the scheme.

Should the line be built Lisbon will then have two through lines of railroad and the increased shipping facilities will make this point exceedingly attractive to manufacturers. The operations of the engineers have been kept exceedingly quiet and but few have been aware of the destination of the route which has been surveyed. Friday evening practically completed the work with the exception of some certifying of the figures of the last two miles of the route.

The object of the extension is to secure the large coal fields near West Point and also to provide an outlet for the Erie which will be then able to handle a large share of the freight from East Liverpool and Wellsville.

The engineers will complete their work within the next few days and the securing of the right of way and actual construction will be begun as soon as possible.

Automobile Struck Wagon.

The Salem Herald says a bad smash-up occurred Saturday morning about 9 o'clock on Ellsworth avenue when Arthur Leyman was dumped into the ditch by being struck with an automobile. It is claimed by several who witnessed the accident that the driver of the auto was responsible for the wreck.

Mr. Leyman, who has a considerable meat trade in this city and who lives north of the city, was making his rounds and as he turned to drive into the alley by the Pettit home the car which was following close behind the wagon struck it and knocked horse, wagon and all into the ditch. The wagon was a complete wreck there hardly being a whole piece left of the wagon. For a while it was thought that the horse had been fatally injured but upon further examination it was cut about the head and skinned about the body.

Mr. Leyman was thrown from the wagon and landed on his head on top of his horseman was sustained a number of cuts about the hands and face from the broken glass.

The driver of the auto was Mr. Chambers of Niles and he was accompanied by his wife. They were driving from that city here on a visit. Mr. Chambers stated that he did not think it was his fault and that he did not intend to help pay for any of the damage. His machine was damaged but little. After helping to take the horse out of the ditch he drove on into the city.

The number of his car was taken by Mr. Leyman and he expects to see what can be done in regards to having Mr. Chambers pay for some of the damages as he claims the auto was not being run at a proper distance back of the rig.

Boys' Wheat Growing Contest. Five thousand Ohio boys are wanted to enter a one-acre wheat growing contest this year in Ohio. The great success of the boys' corn growing contest has encouraged the Ohio state board of agriculture to promote the wheat contest in the growing of wheat.

The Ohio State Millers' Association and Ohio grain dealers, many Ohio bankers and business men, have pledged support to this enterprise. Many lessons and valuable experiences are being gained from the boys' contest on corn.

Ohio can be made a great wheat-producing state. The wheat failure this year is no sign that a good crop cannot be grown next year.

The prize to be offered to the boy who wins in each county is a free trip to the nation's capital. Every farmer's son should get ready to go into this fight. It costs nothing to try. The wheat will grow and the crop will ripen while the boy is in school.

Meetings will be held in every county in Ohio to arrange the details of this contest. For further information address the Secretary, A. P. Sandies, Columbus, O.

DEAFNESS CANNOT BE CURED by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed, you have a running sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and the tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free.

IF THOU couldst speak a word of cheer, Oh, speak it now. This moment is thine own.

HELPFUL HINTS.

Lettuce, parsley, cucumbers and radishes may be kept fresh and crisp by draining after washing in cold water, then cover in a tight dish.

Potatoes, especially the new ones, may be reheated when cooked by dropping them into boiling water for a few moments, to become hot.

Kitchen floors and tables of pine may be made white by scrubbing them with cold water, soap and wood ashes. This is rather hard on the hands, however.

Soured towels may be treated in this manner and become white again. Place them in a kettle and cover with cold water. Add shavings of pure soap and the juice of a lemon. Place on the back of the stove and allow the water to gradually come to a boil. If very much soiled the process may have to be repeated.

When food has cooked on to a dish, remove it from the heat and set it at once into cold water. The steam will escape from the outside instead of passing up through the food. Remove the food from the pan and proceed with the cooking, or add the sauce and serve.

When beating eggs, beat the whites first and add a spoonful of the beaten whites to the yolks. They will beat up much lighter and the yolks will not stick to the beater.

When lighting the gas, strike the match and slowly turn on the gas. So many people turn on the gas full force, then apply the match, an explosion follows which sends the meter forward.

Orange fritters are as delicious an accompaniment to broiled or fried ham as well as duck, as is apple sauce to spare rib.

Some one who knows says that paraffine rubbed on the heels and toes of stockings will cause them to last much longer.

Mint may be steeped and strained and kept to add to lemonade for a palatable and cooling drink.

Mint vinegar is another use for the fragrant mint. In preparing any drink of mint the water should be kept covered until cool so that the flavor is not lost.

Castors need oil occasionally, not too much, for it may soil the rug or carpet by dripping, or gather dust. The caster should be carefully wiped after applying the oil.

Line some small patty tin with pastry, bake and then fill with stewed figs, add the sirup and top it with whipped cream.

Some Ways With Fruit. There is no better way to serve the rosy currant than rolling in sugar and well chilled; but as one likes variety, here is a very nice

Ripe Currant Pie.—Bake a shell of pastry and fill with the following: A cup of crushed currants, a cup of sugar, two eggs, two tablespoonsful of water and one of flour. Beat the yolks of the eggs with flour and water, mix with the fruit, sugar, and stew until smooth. Bake in the pastry shell and cover with a meringue made of the whites of the eggs and two table-spoonfuls of sugar; brown and serve either hot or cold.

Raspberry Whip.—Mash a cup and a half of raspberries; add a cup of pulverized sugar, a pinch of salt and the white of an egg and beat all together thirty minutes. Serve heaped on a platter surrounded with whipped cream. Serve with macaroons.

Raspberry and Currant Frappe.—Moll a quart of water and a cup and a third of sugar for thirty minutes; add one and a third cups of currant juice, two-thirds of a cup of raspberry juice; freeze.

Salsaparilla Fruit.—Shred a pineapple; add a banana or two cut fine, an orange sliced and grape fruit; mix with a cup of sugar and a table-spoonful of water boiled until it boils; add a table-spoonful of lemon juice, and when cool pour over the fruit. Serve chilled in tall glasses garnished with a Maraschino cherry.

Currents dipped in white of egg and rolled in granulated sugar are pretty served for first course. The currents should be large ones and left on the stems.

Cherish Noble Traditions. If we have noble traditions, these are the days when the national need demands that we should live as close to them as possible.

PRAISE FOR "BIG SIX"

Joe Tinker Ridicules Idea Mathewson Is Going Back.

Chicago Shortstop Enthusiastically Declares That Christy Is the Greatest Pitcher in World—Twirler Lauds Cub Infielder.

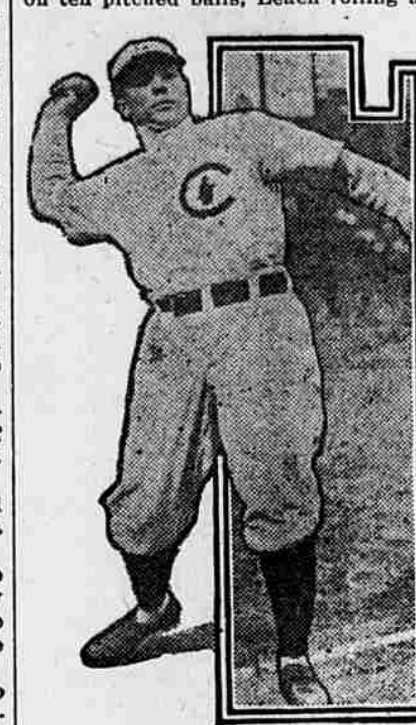

The arch battling agency of Christy Mathewson saw the finishing slaughter of the Cubs through a crack in the center field fence during the recent memorable series in New York. He had just been ejected from the game.

"Say, Joe," was asked—yes, it was Tinker—"do you think Matty is going back?"

"Behave!" he said with a laugh. "What's the idea of that question?" "Everybody's asking it lately," was explained.

"There's your answer now," he replied, pointing to the diamond and the whooping, happy crowd. "Any time a man can pitch nine strikes out of ten thrown balls and retire the side, you can bet your little bank roll that he isn't going back very far. Control like that will win even after his curve has gone."

When Mathewson performed his feat of sending the Cubs to the junkshop in exactly four minutes the crowd gave him a wonderful ovation. Ames was taken out to substitute a batter, and Matty went in and cut loose. He began by striking out Downs and Miller. The side was out on ten pitched balls, Leach rolling an

easy one to second. In the next inning Matty struck out Sauer, using a total of eight balls to retire the three batters.

"No," added Joe Tinker, as he walked over to the clubhouse, "Matty isn't a dead one yet. If the New York club ever thought so, I wish they would ship him to the Cubs."

Notwithstanding the fact that Tinker has found Matty easier to hit than any pitcher in the league, he enthusiastically declared the big fellow is the greatest pitcher in the world. "Show me a man who has

done what he has done in eleven years, and I might take it back," said Joe.

"Just for fun the writer looked up Mathewson."

"Whom do you consider the greatest batter in the world?" was asked of him.

"That's a hard one to answer," he replied. "I have never seen a better natural hitter than Chief Meyers. The hardest man I have ever had to pitch to, however, is Joe Tinker."

And there you are. Here are two men arch enemies at 4 o'clock and members of a mutual admiration society at 7.

Generally. Visitor—"How do you get along with your rival town, Bungville?" Native—"Same as all rival towns do. The Civic League in each town works from October to April promoting friendly relations between the two towns, and the first baseball game we play them undoes it."
